

# SailPoint and the Cyber Assessment Framework

Today's modern Local Authorities must prevent cybersecurity threats while sustaining a productive workforce, reducing operating costs and providing improved services to citizens. Managing thousands of identities in ever-changing environments and their access to essential applications is a critical component in fortifying the attack surface. Yet, it's no secret that identity and security teams are struggling to keep up with access control and governance. A largely human-based, manual approach in siloed systems leads to over provisioning access and causes non-compliance and unnecessary exposure to risks.

The Cyber Assessment Framework (CAF), produced by the National Cyber Security Centre, is aimed at helping an organisation achieve and demonstrate an appropriate level of cyber resilience.

SailPoint's AI-driven security platform provides the autonomous governance that helps solves the needs for Local Authorities seeking to deliver CAF outcomes related to identity security.

CAF Objective	Benefits
Managing Security Risk	<ul style="list-style-type: none"><li>• Manage supply chain access to ensure non-employees have the right access to essential functions and data, at the right time</li></ul>
Protecting against cyber attacks	<ul style="list-style-type: none"><li>• Ensure all users (and machine identities) have the least privilege necessary to perform their duties.</li><li>• Periodic access review of essential functions with AI recommendations.</li><li>• Discover, catalogue and govern sensitive data.</li></ul>
Detecting cyber security events	<ul style="list-style-type: none"><li>• Automatically discover abnormal access rights and take appropriate action to review.</li></ul>
Minimising the impact of cyber security incidents	<ul style="list-style-type: none"><li>• Take automatic action to reduce the blast radius when risk signals are detected</li></ul>

## About SailPoint

SailPoint is the leading provider of Identity Security for the modern enterprise. Enterprise security starts and ends with identities and their access, yet the ability to manage and secure identities today has moved well beyond human capacity. The SailPoint Identity Security Platform delivers the right level of access to the right identities and resources at the right time—matching the needs of a modern Local Authority. Our intelligent, autonomous, and integrated platform puts Identity Security at the core of digital business operations, enabling even the most complex organisations to build a security foundation capable of defending against today's most pressing threats.
